

# EOS-S20

## EOS Twin Glass Evacuated Tube Solar Collector

The EOS-S20 is ideally suited to fulfill up to 80-100% of the annual hot water demands for households with 2-3 people, small businesses, or summer homes.

- With EOS solar collectors you will see a quick payback with an actual return on your investment.
- Generates zero greenhouse gas CO2 emissions...Can eliminate up to 5 tons or more of household greenhouse gas emissions annually.
- EOS collectors can incorporate into any electric, gas, oil fired, or heat pump system.
- Designed for high performance in any climate. (effective down to -22°F.)
- Fully expandable and upgradable as demands increase.
- Can withstand up to one inch hail stone impacts.
- Can be mounted on the ground, wall, flat roof or pitched roof.
- Simple, reliable, maintenance free operation.

### 15 YEAR LIMITED WARRANTY

*Harness the power of the sun for your domestic and radiant hot water needs.*

Double Time Convenience Store in Rockport, Maine features two EOS-S20 collectors. The system consists of an 80 gallon solar pre-heat tank that feeds an instant on tankless hot water heater. This design provides all of the store's domestic hot water needs with an optimum level of efficiency.

**"We have seen a dramatic decrease in our hot water heating costs...it should pay for itself within a few years...With the issues of global warming so important today we are trying to do our part to help..."**
